

Dynamic Inspection Dynaweigh Integrated Product Inspection Point Combicheck System

Our combicheck system is designed for those who are looking for something a bit special that is tailored to meet specific requirements whilst at the same time being designed for ease of use and maintenance. Wherever possible the components used are selected as being industry standard with many thousands in use already, well proven, familiar, readily available and easily upgradeable to future proof the product. As well as the extensive list of standard features, there are many other options available to further enhance this integrated product inspection point.

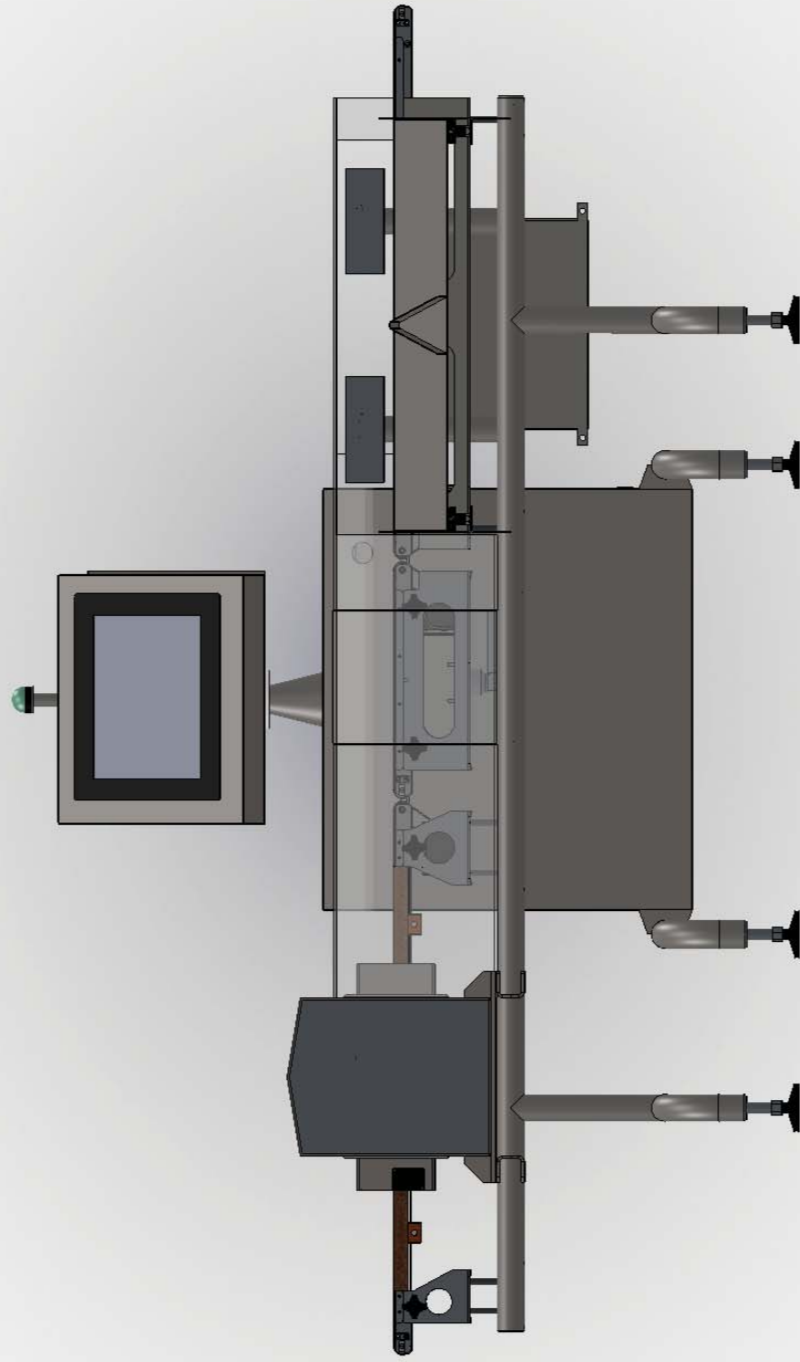

Standard features include:

-
- Totally integrated functions
 - 15" touch screen interface
 - Industry standard components
 - Full stainless steel construction
 - Hygienic, washdown design
 - 4 speed selection (programmable)
 - 3 phase motors
 - Digital loadcell
 - Status supervisory
 - 100 product memory
 - Robust security protection
 - Reject confirmation (metal & weight)
 - USB data download
 - Draught cover
 - 2 x reject mechanisms (metal & weight)
